

3.1 Problem Solution Fit

Auto Ticket Classification using Flow Designer

Item	Description
Customer segment	School students, teachers and the IT helpdesk staff
Problem	Manual ticket review causes delay, wrong routing and staff overload
Jobs to be done	Get IT issues resolved quickly; sort and assign tickets with less effort
Triggers	Class disruption, login failure, exam time, many tickets in the queue
Existing alternatives	Manual reading, phone calls, walking to the IT room, email
Our solution	Flow Designer automation that classifies, prioritises and assigns incidents instantly
Emotions before	Frustration, anxiety, pressure
Emotions after	Confidence, relief, trust in the helpdesk
Channels	Service portal, email notification

Fit: the automation directly removes the manual step that causes the delay, so the problem and the solution match.
