

2.4 Technology Stack

Auto Ticket Classification using Flow Designer

Layer	Technology	Purpose
Platform	ServiceNow (Personal Developer Instance)	Hosts incident management and the automation
Automation	Flow Designer	Trigger, conditions and actions for classify, prioritise, assign
Data	Incident table, Assignment Groups, Category field	Stores tickets and routing data
Notifications	ServiceNow Email Notifications	Acknowledgement and assignment alerts
Reporting	ServiceNow Reports and Dashboards	Tickets by category, priority, state
Access	Roles and ACLs	Controls who can create, view and edit
Optional future	ML / GenAI classification model	Handle tickets that keywords cannot classify

Low-code approach: no separate server, database or front-end needs to be built, which keeps the project simple and quick to deploy.
